

# SOCIAL IMPACT

Every \$1,000 donated to OzHarvest means:

- we can provide 2,000 meals to people in need,
- we are saving 667 kg of food from going into landfill,
- which avoids 1067 kg of greenhouse emissions\* and
- saves over 95,000 litres of water\*\*.

**For every \$1 invested in OzHarvest, our Social Return On Investment (SROI) to the community is \$6.43.**

Calculations used are: \$1 = 2 meals OzHarvest can deliver to people in need; 1kg of food = 3 meals; 1kg of food saved = 1.6 kg of greenhouse emissions avoided/saved (on average)\*; 1 kg of food saved = 143 litres of water saved (on average)\*\*

\*The Department of Environment: NATIONAL GREENHOUSE ACCOUNTS FACTORS Australian National Greenhouse Accounts, 2014 - noting kg greenhouse emissions are kg CO2-eq.

\*\* Hyder Report 2010.

\*\*\* The actual amount of water to produce different types of food varies greatly from food type to food type and is evolving as more and more research is undertaken, along with greenhouse emissions.
